Coolbeans94: Looking at the current difficulty level here: Looking to monitor this over time.. As of 14 September 2013, Difficulty is currently at 1,739,280 478 Current block reward is currently 275.. 34 coins (every 10 minutes) This is currently about 39,600 coins per day, compared to Bitcoin's approximate 3600-4800 coins per day (depending on miners speed) Current price is ~0.

19 USD or 0 0015 BTC This would be about 14,454,000 new coins per year (if the difficulty stays the same).. It seems to me that PPC is really undervalued at the moment
